

PRODUCT OVERVIEW

Reverb Commerce

Complete Product Feature & Technology Documentation

Designed and developed by Reverb Solution, Reverb Commerce connects a modern customer storefront with the complete merchant workflow required to manage products, content, orders, customers, payments and growth.

Platform at a glance

- Responsive storefront for mobile, tablet and desktop.
- Full-screen catalog search plus an AI shopping assistant grounded in live inventory.
- Detailed product pages with images, sizes, stock and size charts.
- Persistent wishlist and shopping cart without customer registration.
- Guest checkout with promo codes and configurable delivery charges.
- Cash on Delivery and optional bKash Tokenized Checkout.
- Public order and courier tracking with branded email confirmations.

Customer experience

- Low-friction journey from product discovery to checkout.
- Clear pricing, discounts, availability and delivery totals.
- Mobile shopping navigation and touch-friendly controls.
- Human-style AI guidance plus WhatsApp or Messenger access for assistance.
- Brand content, reviews and promotions throughout the storefront.
- No account or password required to place an order.

Merchant experience

- Central dashboard for orders, sales, customers and stock.
- Product, category, variant and inventory management.
- Quick approval plus Pathao, Steadfast and REDX fulfilment.
- Customer records, order history, reports and exports.
- Homepage, About, promotion, review and policy content tools.
- Brand, delivery, payment, courier, email and analytics settings.
- Staff roles, protected admin routes and detailed audit history.

Business value

- One connected system replaces separate catalog and order tools.
- Daily store operations can be completed without code changes.
- Local payment and Bangladesh courier workflows are built in.
- Campaign content and store appearance remain merchant-controlled.
- Commercial activity is visible through KPIs, charts and reports.
- Managed cloud services provide a practical path for growth.

CUSTOMER EXPERIENCE

Storefront & Product Discovery

A responsive shopping experience designed to help customers find, understand and save the right products.

Responsive storefront

- Layouts optimized for phone, tablet and desktop.
- Dedicated mobile bar for Contact, Cart, Shop, Saved and Search.
- Live cart and wishlist counters in navigation.
- Dynamic desktop category menu.
- Touch-friendly filters, dialogs and shopping controls.
- Configurable color palette, motion and branded not-found page.

Homepage merchandising

- CMS-controlled section ordering and visibility.
- Auto-rotating banner carousel with manual controls.
- Separate desktop and mobile campaign artwork.
- Scheduled banner start and end dates.
- Category tiles and configurable featured products.
- Customer-review marquee and promotional strip.
- Session-aware promotion popup and rich-text brand sections.

Catalog discovery

- Full-screen discovery workspace for direct search and AI guidance.
- Case-insensitive title search with live visual product results.
- Search stays inside the workspace until a product is selected.
- Multi-category and stock-availability filtering.
- Minimum and maximum price filters.
- Price and alphabetical sorting.
- Live result counts, reset control and empty-result guidance.

Product cards & quick shopping

- Main and hover imagery.
- Current price, original price and discount percentage.
- New, discounted and sold-out badges.
- Wishlist control and stock-aware quick actions.
- Quick Add dialog with size, quantity, Add to Cart and Buy Now.

Product detail pages

- Search-friendly URLs generated from product slugs.
- Multi-image gallery, thumbnails, counter and navigation.
- Current/original pricing and calculated discount.
- Stock-driven size selection with disabled unavailable options.
- Quantity selector and low-stock messaging.
- Rich descriptions with headings, lists and links.
- Product-specific chest and length size charts.
- Add to Cart, Buy Now and Add to Favorites.

Wishlist, cart & customer content

- Browser-persistent wishlist with individual and Clear All removal.
- Browser-persistent cart with separate entries by product and size.
- Quantity updates, line removal, line totals and subtotal.
- Dedicated published-reviews page with ratings and photos.
- CMS-driven About, Privacy, Terms and Refund pages.
- Contact form plus clickable store email and phone.

INTELLIGENT DISCOVERY

Search & AI Shopping Assistant

A modern discovery workspace combines immediate catalog search with conversational, inventory-aware product guidance.

Unified discovery workspace

- Full-screen editorial interface aligned with the active store theme.
- Clear Search and Ask AI modes inside one customer journey.
- Oversized query surface with responsive desktop and mobile layouts.
- Live inventory connection indicator and focused product navigation.
- The underlying catalog page remains unchanged while customers explore.
- Selecting a result closes discovery and opens its product page.

Live product search

- Debounced case-insensitive product-title matching.
- Up to twelve active results returned from the current catalog.
- Editorial product cards with imagery, current price and original price.
- Dedicated loading, unavailable and no-result presentations.
- Search requests are isolated from storefront filters and page state.
- Special search characters are safely handled by the server.

Guided starting points

- One-tap prompts for personality matching, gifts and budget-led shopping.
- Customers may begin with a person, occasion, goal, style or feeling.
- Suggested replies make follow-up questions quick on mobile.
- Reset Brief starts a fresh recommendation conversation at any time.

Human-style sales guidance

- Warm conversational guidance designed to feel like an attentive salesperson.
- Adapts to the customer's language, tone and level of formality.
- Asks only decision-critical questions and recommends without over-interviewing.
- Leads with a clear first choice when the catalog supports one.
- Connects product details to customer benefits, occasions and preferences.
- Explains useful tradeoffs and encourages a natural, low-pressure next step.

Catalog-grounded recommendations

- Considers personality, recipient, occasion, budget, style, color and size.
- Uses active product titles, descriptions, types, categories and variants.
- Out-of-stock products and unavailable variant options are excluded.
- One strong recommendation or up to three meaningful alternatives.
- Every returned product ID is revalidated against the live catalog.
- Prices, imagery and product links are attached by the store server.

Reliable customer conversation

- Structured OpenRouter responses with automatic response healing.
- Recovery for fenced JSON, text-wrapped JSON and provider content parts.
- Unusable responses become a natural follow-up question, not a technical error.
- Connection failures preserve the customer's last message for easy retry.
- Provider data-collection filtering is requested on every AI call.

COMMERCE JOURNEY

Checkout, Payments & Order Tracking

A complete guest-purchase workflow with local payment options, delivery pricing and clear post-purchase communication.

Guest checkout

- No customer account required.
- Validated email, name, phone and delivery address.
- Optional postal code and delivery-note support.
- Optional local saving of delivery information.
- Responsive checkout with desktop order-summary panel.
- Product image, size, quantity and price summary.
- Subtotal, discount, delivery and final total calculation.

Delivery & promo codes

- Inside Dhaka and Outside Dhaka delivery zones.
- Separate merchant-configurable delivery charges.
- Promo codes normalized for consistent entry.
- Percentage discounts with active and date validation.
- Discount applied to merchandise subtotal only.
- Promo code revalidated when the order is submitted.

Cash on Delivery

- Always available as the default payment option.
- Immediate order placement and confirmation.
- Customer cart cleared after successful submission.
- Merchant and customer email workflow triggered after order creation.

bKash Tokenized Checkout

- Optional integration when the store operates in BDT.
- Merchant-controlled enable, sandbox and live modes.
- Hosted bKash payment redirect.
- Payment execution and status-query fallback.
- Race-safe finalization with payment and transaction IDs.
- Failed payments removed immediately with stock restoration.
- Hourly-expired unpaid orders cleaned every 15 minutes.
- Automatic return to order tracking after successful payment.

Order communication

- Generated human-readable order numbers.
- Branded customer confirmation email.
- Separate owner notification with optional additional recipients.
- Emails include products, delivery information, discounts and totals.
- Store logo and active theme colors applied to messages.

Customer order tracking

- Public lookup using the order number.
- Progress through Pending, Confirmed, Processing, Shipped and Delivered.
- Separate cancelled-order presentation.
- Order date, delivery area and customer summary.
- Payment state, bKash transaction ID and courier tracking code.
- Courier status, update message and recent event history.
- Products, quantities, totals, discount and delivery charge.

MERCHANT OPERATIONS

Dashboard, Catalog & Fulfilment

Operational tools give staff direct control over products, inventory, orders, customers and business documents.

Merchant dashboard

- Personalized live overview for the signed-in team member.
- Orders today and during the last seven days.
- Seven-day and all-time booked sales.
- New customers, low-stock variants and pending orders.
- Seven-day order-volume and sales charts.
- Recent orders with customer, status, date and total.
- Quick links to common operational tasks.

Products & categories

- Create, edit, search, reorder and permanently delete products.
- Active, draft and archived product states.
- Automatic URL slugs with manual override.
- Original/current prices, product type and rich description.
- Assignment to multiple categories.
- Create, edit, search, reorder and delete categories.
- Product count shown for each category.

Product media & size charts

- Maximum five product images at 4 MB each.
- Main-image selection for cards and gallery.
- Category images limited to 4 MB.
- Optional product-specific size, chest and length charts.
- One-click default tee size-chart template.

Variants & inventory

- Optional sizing, size-free inventory, and automatic or manual SKUs.
- Stock quantity and low-stock threshold per variant.
- One-click default tee variants.
- Inventory sorted from lowest stock upward.
- Search by product, SKU, size or color.
- Low Stock Only filter and stock-status badges.
- Inline non-negative stock updates.

Orders & fulfilment

- Search by order number or customer and filter by status.
- Quick Approve and Send to Courier actions on order cards.
- Atomic Pathao, Steadfast or REDX shipment reservation.
- One active provider for new shipments; old shipments stay linked.
- Authenticated webhooks, manual refresh and event history.
- Safe automatic progress to Processing, Shipped and Delivered.
- Courier-linked orders cannot be cancelled, moved or deleted.

Customers, reports & documents

- Customer directory searchable by name, phone or email.
- Order count, lifetime ordered value and full order history.
- Bulk customer deletion controls.
- Summary totals for orders, sales, products and customers.
- Orders and products CSV exports.
- Individual branded PDF invoices.
- Bulk invoice ZIP downloads.

CONTENT & ADMINISTRATION

CMS, Settings, Team & Security

The merchant can update storefront content, campaigns, branding and team access without modifying application code.

Homepage & banner CMS

- Predefined Banner, Categories, Featured, Reviews, Promo and Rich Text blocks.
- Drag-and-drop section ordering and visibility controls.
- Section headings, subtitles, CTA controls and item limits.
- Create, edit, activate, reorder and delete banner slides.
- Desktop/mobile banner images limited to 6 MB.
- Editable banner statistics and scrolling marquee.

About & legal content

- Structured Hero, Statistics, Story, Values, Craft and CTA sections.
- Section ordering and visible/hidden controls.
- Rich story content, value cards and craft specifications.
- About images limited to 6 MB.
- Rich-text Terms, Privacy and Refund page editing.

Promotions, reviews & contact

- Create, edit, search, activate and delete promotions.
- Promotion image, percentage, CTA and linked product.
- Promo codes with status, start date and expiry.
- Create, publish, hide and delete reviews with 1-5 star ratings.
- Promotion and review images limited to 4 MB.
- Contact inbox with unread count, search and read/unread state.

Brand, store & integration settings

- Store name, logo, favicon, email, phone and address.
- Facebook, Instagram and X links.
- Five built-in themes plus full custom palette controls.
- Live theme preview and reset option.
- BDT, USD and INR display settings.
- Inside/Outside Dhaka delivery pricing.
- Gmail/custom SMTP with live login verification.
- Courier credentials, active provider and webhook setup.

Staff access & audit

- Supabase email/password authentication.
- Administrator, editor and viewer role assignment.
- Create, edit and delete staff accounts.
- Manage email, name, role and replacement password.
- Protected admin routes and Row Level Security.
- Append-only audit trail across key merchant operations.
- Audit search, action/entity filters and structured metadata.

Media storage & maintenance

- Six dedicated media libraries with staff-restricted writes.
- Drag-and-drop uploads, previews, crop and main-image selection.
- Storage used, remaining capacity, file count and warning levels.
- Daily unused-media scan with recent-file protection.
- Manual cleanup with dry-run mode.

TECHNOLOGY & GROWTH

Technology Stack & Platform Capabilities

A modern full-stack architecture supports performance, discoverability, integrations and ongoing store operations.

Core technology stack

- Next.js 16 App Router and React 19.
- TypeScript 5.9 and Tailwind CSS 4.
- Supabase PostgreSQL, Authentication, RLS and Storage.
- Supabase browser, server and middleware clients.
- Radix UI primitives and Lucide icons.
- TipTap rich-text editor.
- Zustand persistent client state.
- Recharts dashboards and dnd-kit ordering.
- date-fns calendar and reporting utilities.
- jsPDF and JSZip document generation.
- Nodemailer email delivery.

Architecture & integrations

- Next.js server components, route handlers and server actions.
- Node.js runtime for payments, email and privileged operations.
- bKash Tokenized Checkout API.
- Pathao, Steadfast and REDX APIs with authenticated webhooks.
- Gmail/custom SMTP with live server-login validation.
- Google Analytics, Google Tag Manager and Meta Pixel.
- WhatsApp and Facebook Messenger links.
- OpenRouter structured-output integration for catalog-grounded AI guidance.
- CSV feeds and downloadable business exports.

SEO & discoverability

- Page-level titles, descriptions, keywords and Open Graph images.
- Canonical URLs and social-sharing metadata.
- Dynamic product metadata from live catalog content.
- Schema.org Product structured data.
- Dynamic XML sitemap with active products.
- Robots rules for storefront and checkout pages.
- Live CSV product feed.
- Meta events for product view, cart, checkout and purchase.

Performance & operations

- Responsive image optimization and loading placeholders.
- Fresh uncached catalog, CMS and admin data.
- Parallel server-side data loading on key pages.
- Persistent cart, wishlist and optional delivery data.
- Database cleanup every 15 minutes for abandoned gateway orders.
- GitHub Actions daily storage maintenance.
- Standard Node/Vercel-compatible build and deployment workflow.

Current platform scope

- Guest-first shopping with browser-based cart and wishlist.
- One administrator-selected display currency at a time.
- Courier webhook/manual-refresh status, not live GPS tracking.
- Staff-curated reviews and storefront content.
- Cash on Delivery and bKash payment methods.
- Ideal for apparel, accessories and focused retail catalogs.
